Experienced Mud Logger with 3+ years of onshore oil and gas operations in Kuwait, including directional and horizontal drilling campaigns. Responsible for real-time monitoring and recording of key drilling parameters such as ROP, WOB, RPM, torque, flow rate, and pit volumes to ensure safe and efficient drilling operations. Conduct continuous gas monitoring using gas detection equipment and perform chromatograph analysis to identify and report hydrocarbon shows accurately. Carry out systematic collection, washing, and lithological description of drill cuttings at regular intervals, maintaining detailed sample logs and geological reports for client and company records. Prepare and submit accurate daily drilling reports, morning reports, and end-of-well reports in a timely manner. Monitor drilling trends for early indicators of abnormal formation pressure, potential kicks, or well control events, and communicate findings immediately to the company man and drilling engineer. Coordinate effectively with geologists, directional drillers, and rig crews to support well objectives and ensure data integrity throughout the drilling program. Ensure all mudlogging equipment is properly calibrated, maintained, and functioning at all times. Adhere strictly to HSE regulations and company safety protocols on-site, contributing to a safe working environment across all stages of drilling operations.

IWCF Well Control Certified with solid knowledge of kick detection and pressure control procedures. H2S Safety certified with field experience in high-risk environments. Holds MWD certification supporting coordination with directional drilling teams for real-time downhole data interpretation. Proficient in mudlogging data acquisition systems and formation evaluation.
