Sub Industry	Secretarial or Administrative
Nationality	Pakistan
Primary Language	English,
Secondary Language	English,
Total Years of Experience	12

Additional Information

Roles and Responsibilities	Additional Skills/Certification
-----------------------------------	--

I am currently serving as Deputy Chief Reservoir Engineer – Shale Gas & Tight Gas at OGDCL, where I support unconventional field development planning, production forecasting, and coordination with drilling, completions, and stimulation teams. This role requires close involvement in technical evaluations, scope definition, cost benchmarking, and management submissions, strengthening my exposure to operator-side commercial and technical decision-making. Previously, I worked as a Frac Consultant with Baker Hughes on integrated and unconventional projects across the MENATI region, where I supported technical bid reviews, scope alignment, execution readiness, and interface management between engineering, operations, and commercial teams. I bring over 10 years of experience with SLB (Schlumberger), where I held technical, operational, and commercial leadership roles in stimulation and hydraulic fracturing across Pakistan, Oman, UAE, and Yemen. I was actively involved in tender preparation, technical proposals, cost models, risk reviews, bid clarifications, contract support, and post-award handover to operations, while managing client engagements with national and international operators including ADNOC Group, PDO, Shell, and Oxy. With a strong engineering foundation (MSc Petroleum Engineering, BE Mechanical Engineering) and hands-on experience in tendering, pricing strategy, technical-commercial alignment, and stakeholder coordination

Attached

Education Summary

Course	University	Passing Year	Country
MSc Petroleum Engineering	Heriot watt university	2013	United Kingdom
