-----------------------------------	--

Experienced Mud Logger with 3 years of hands-on field experience in oil and gas drilling operations, with a strong background in real-time monitoring of drilling and geological data. Skilled in observing and interpreting drilling parameters such as ROP, WOB, RPM, torque, standpipe pressure, and mud properties to identify drilling trends, formation changes, and potential wellsite issues. Proficient in collecting, describing, and documenting drill cuttings and gas samples, while maintaining accurate lithology logs and supporting formation evaluation activities. Experienced in monitoring gas readings, hydrocarbon shows, and mud behavior during drilling operations to help ensure safe and efficient well progress. Capable of preparing daily geological reports, shift handover reports, and maintaining accurate records of wellsite data and sample intervals. Strong understanding of drilling operations, wellsite communication, and coordination with drilling supervisors, geologists, mud engineers, and rig crew to support operational decision-making.

Mud logging operations and wellsite monitoring
 Formation evaluation basics
 Lithology description and sample analysis
 Gas detection and gas chromatograph monitoring
 Drilling parameters interpretation
 ROP, WOB, RPM, Torque, and SPP monitoring
 Daily drilling reports and well documentation
 Data acquisition systems and real-time monitoring software
 Good communication and teamwork under rig site conditions
 Microsoft Office (Excel, Word, PowerPoint)
 HSE awareness and safety compliance
 Ability to work under pressure and rotational shifts
