## Additional Information

| <b>Roles and Responsibilities</b> | <b>Additional Skills/Certification</b> |
|-----------------------------------|--|
|-----------------------------------|--|

A Toolpusher on an oil and gas drilling rig is the senior supervisor responsible for managing all drilling operations, personnel, and equipment. The role ensures that activities are carried out safely, efficiently, and in line with the approved drilling program. The Toolpusher oversees daily operations, monitors well conditions, and quickly resolves technical issues such as pressure problems or equipment failures. They supervise the rig crew, including drillers and roughnecks, assign tasks, and manage shift rotations to maintain continuous 24/7 operations. In addition, the Toolpusher is responsible for equipment management, ensuring that all machinery is properly maintained and that necessary tools and spare parts are available. Safety is a key priority, and the Toolpusher enforces Health, Safety, and Environment (HSE) regulations, conducts safety meetings, and works to prevent accidents such as blowouts. The role also involves reporting and communication, including preparing daily operational reports and coordinating with engineers, managers, and company representatives. Overall, the Toolpusher plays a critical role in ensuring the safety, productivity, and success of drilling operations, requiring strong leadership, technical expertise, and the ability to perform effectively under pressure.
