Salary (in USD)	100/Per Day
Industry	Oilfield Services
Sub Industry	MWD / LWD
Nationality	Egypt
Primary Language	Arabic,
Secondary Language	English,
Total Years of Experience	4

Additional Information

Roles and Responsibilities	Additional Skills/Certification
-----------------------------------	--

As a Mud Logger with 4 years of experience, I am responsible for monitoring and recording all drilling parameters in real time, including rate of penetration, gas levels, mud properties, and drilling activities. I collect, describe, and analyze rock cuttings to determine lithology and identify any hydrocarbon presence. I ensure accurate and detailed logging of geological and drilling data, preparing daily reports and communicating critical information to the drilling team, geologists, and supervisors. I also monitor gas detection systems and ensure proper calibration and maintenance of mud logging equipment. In addition, I assist in identifying abnormal pressure zones and potential drilling hazards, contributing to safe and efficient operations. Maintaining strict adherence to HSE policies and procedures is a key part of my role, especially when working in high-risk and remote environments.

I possess strong technical knowledge of mud logging operations, drilling processes, and formation evaluation. I am experienced in using data acquisition systems, gas detection equipment, and sample analysis techniques. I have excellent attention to detail, problem-solving skills, and the ability to work effectively under pressure and in rotational shifts. I hold relevant safety certifications such as H2S Safety, Basic Fire Fighting, and First Aid (if applicable), along with a strong commitment to continuous learning and professional development.

Education Summary

Course	University	Passing Year	Country
Geology	Kafr El-Sheikh	2022	Egypt
